Eriez® Now Offers 10-Day Xpress Delivery on Select SE 7000 Suspended Electromagnets

Erie, PA--- Eriez® is now offering [10-Day Xpress Delivery on six of its most popular Series SE-7000 Suspended Electromagnet models](#). The quick-ship, manual clean magnets range from 42 to 78 inches wide, offering a size to meet most typical conveyor widths. Each magnet is available with cable sling or turnbuckle suspension and either a NEMA 4, 4X or 9 junction box.

Suspended magnets are typically hung over conveyor belts carrying coal, minerals, aggregates, wood chips and other bulk materials to remove dangerous tramp iron that can damage crushers, hammer mills, conveyor belts and other sensitive processing equipment.

By employing “lean manufacturing” techniques to expedite process flows and gain manufacturing efficiencies, Eriez has improved the “desk-to-dock” process to assemble, test and ship these models in just 10 days.

The SE models available through the 10-Day Xpress Delivery program include the following:

- Model SE7338 (42-inch wide magnet)
- Model SE7535 (54-inch wide magnet)
- Model SE7635 (60-inch wide magnet)
- Model SE7735 (66-inch wide magnet)
- Model SE7835 (72-inch wide magnet)
- Model SE7935 (78-inch wide magnet)
